ICSE 2027 EXAMINATION

QUESTION BANK

GEOGRAPHY

(H.C.G. PAPER – 2)

Chapter-wise compilation with years of appearance

Maximum Marks: 80 Time allowed: Two hours (per paper)

Chapters covered

1. Natural Vegetation
2. Water Resources
3. Mineral and Energy Resources
4. Agriculture
5. Topo Sheet (Question 1)
6. India Map (Question 2)

Papers included

ICSE 2023 Board • ICSE 2024 Specimen & Board • ICSE 2025 Specimen & Board • ICSE 2026 Specimen & Board • ICSE 2027 Specimen

How to use this bank

- The year-wise sections have been removed. Questions that appear word-for-word in more than one paper are merged into one question, and the years in which it appeared are written under it in blue: [2026] = Board paper, [2026S] = Specimen paper (e.g. [2023] [2025S] [2026]).
- Each theory chapter (Natural Vegetation, Water Resources, Mineral and Energy Resources, Agriculture) is divided into three categories: A. Multiple Choice Questions, B. Short Questions (1 or 2 marks: a single question, or a single question with two parts), C. Long Questions (3 marks).
- Question parts and marks [ ] are shown as in the original papers; cognitive-level labels have been removed. Questions are merged when their wording is identical (ignoring capital letters, punctuation and the word "the").
- Topo Sheet and India Map questions are listed in one continuous list; in the order they first appeared.
- Items from other chapters (climate, soils, industries, transport, waste management) are left out. No answers are included.

Chapter 1: Natural Vegetation

A. Multiple Choice Questions (1 mark each)

1. Which type of forest is found mostly in the coastal areas of India? [1]
   (a) Tropical Evergreen Forest
   (b) Tropical Desert Forest
   (c) Littoral Forest
   (d) Tropical Deciduous Forest

[2023]

2. Teak and Shisham are the typical trees of which of the following natural vegetation belt? [1]
   (a) Tropical Evergreen
   (b) Tropical Monsoon
   (c) Tropical Desert
   (d) Littoral forest

[2024S]

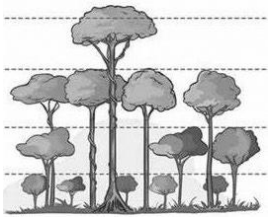

3. Read the table and identify the pair that is correctly matched: [1]

	Natural Vegetation Belt	Tree
P	Tropical evergreen	Babool
Q	Tropical deciduous	Teak
R	Littoral	Ebony
S	Mountain forest	Banyan

   (a) P
   (b) Q
   (c) R
   (d) S

[2024]

4. The type of natural vegetation shown in the picture given below is found in: [1]

   (a) Tropical desert
   (b) Tropical deciduous
   (c) Tropical evergreen
   (d) Littoral forest

[2025]

5. Find the option most similar to: Teak: Tropical Deciduous Forest [1]
   (a) Mahogany: Furniture
   (b) Stilted roots: Mangrove Vegetation
   (c) Ebony: Tropical Rainforest
   (d) Spines: Tropical Desert Vegetation.

[2026S]

6. Identify the option which is most similar to: Tropical Evergreen vegetation : Tall trees and hardwood [1]

(a) Tropical Deciduous vegetation : Pure stands

(b) Tropical Desert vegetation : Small leaves and spines

(c) Coniferous forests : Mountain

(d) Littoral vegetation : Boat making

[2026]

7. Which of the following is NOT a characteristic feature of the Tropical Evergreen Forest? [1]

(a) Dense

(b) Pure stands

(c) Layered structure

(d) Hardwood

[2027S]

B. Short Questions (1 or 2 marks)

1. State two ways in which forests help in protecting the environment. [2]

[2023]

2. Mention two ways in which Tropical Desert vegetation has adapted to its environment. [2]

[2023]

3. Mahesh went for an excursion with his friend and came across a marshy area with trees that had stilt like roots. [2]

(a) Which natural vegetation belt did he come across?

(b) Name an area in India where this kind of vegetation is found.

[2024S] [2025S] [2026S]

4. [2]

(a) Why is tropical deciduous forest commercially the most important forest belt of India?

(b) Why are long and deep roots a typical characteristic of desert vegetation?

[2024S] [2025S]

5. How is tropical monsoon forest useful for the Indian economy? (Any two points) [2]

[2024]

6. Mention the climatic condition that leads to the development of tropical desert vegetation. [2]

[2024]

7. India has lost 2.33 million hectares of tree cover since the year 2000. This is equivalent to a six percent decrease in tree cover during this period. [2]

Source: The Indian Express, Date: 12.04.2024

(a) Mention any two causes of the decrease in the forest cover of India.

(b) Name a conservation method that may be used to help in increasing the forest cover.

[2025]

8. Mention the climatic condition suitable for the development of tropical evergreen forest. [2]

[2025]

9. [2]

(a) How does Social Forestry help to conserve forests?

(b) Why are long and deep roots a typical characteristic of desert vegetation?

[2026S]

10. Why are forests important for the Indian economy? [2]
[2026]

11. Identify the forest conservation methods described below: [2]
    (a) A sustainable system of managing a piece of land through combined production of agricultural crops, forest crops and animal rearing.
    (b) Planting of trees along the side of roads, railway lines and on hill slopes.
[2026]

12. While visiting the Andaman Islands, Sneha comes across Tropical Evergreen Forests characterised by dark forest floors. [2]
    (a) Why are the forest floors dark?
    (b) State the rainfall requirements for this type of forest.
[2027S]

13. Van Mahotsav is a significant event in India's forest conservation program. State two reasons in favour of this statement. [2]
[2027S]

C. Long Questions (3 marks)

1. (a) In which natural vegetation belt is Sundari tree found? [3]
    (b) Why is the Tropical Deciduous Forest commercially the most exploited forest belt of India? (Two points)
[2023]

2. [3]
    (a) Name one region in India where Tropical Evergreen Forest is found.
    (b) Mention the temperature and rainfall conditions found suitable for its growth.
[2023]

3. Give three reasons why forest conservation is the need of the hour. [3]
[2024S] [2025S] [2026S]

4. [3]
    (a) Name a forest conservation method that involves the local community.
    (b) Which primitive system of agriculture had led to large scale destruction of forest in the past?
    (c) Name the process which involves planting two saplings for each tree that is felled.
[2024S] [2025S] [2026S]

5. Give a reason to explain each of the following: [3]
    (a) Mountains have varied vegetation.
    (b) Stilt like / aerial roots are a typical feature of littoral forest.
    (c) The tropical evergreen forests do not look bare at any time of the year.
[2024]

6. [3]
    (a) How has the rising population of India resulted in the loss of forest cover? (Any one point)
    (b) Mention any two forest conservation methods that may be adopted to protect the forests.
[2024]

7. State any three differences between tropical deciduous and tropical desert vegetation. [3]
[2025]

8. [3]

(a) Give any two reasons for the great diversity of natural vegetation in India.

(b) How do the forests help in maintenance of air quality?

[2025]

9. Given below is an image of the forest found in marshy areas. Refer to the image and answer the questions that follow: [3]

(a) Name the type of vegetation seen in the above image.

(b) Mention one adaptive feature of the trees of this vegetation.

(c) Name a region where this type of vegetation is commonly found in India.

[2026]

10. Give one geographical reason to explain each of the following: [3]

(a) Desert vegetation has long roots.

(b) At higher altitudes, trees are often conical in shape.

(c) Tropical Monsoon Forests are also called ‘Tropical Deciduous Forests’.

[2026]

11. [3]

(a) Why are long and deep roots a typical characteristic of desert vegetation?

(b) State the rainfall condition required for the above type of vegetation to evolve.

(c) Mention one region in India where this vegetation is predominant.

[2027S]

12. Forests are ‘Green Gold’. Give three reasons in support of this statement. [3]

[2027S]

Chapter 2: Water Resources

A. Multiple Choice Questions (1 mark each)

1. Which of the following is a ground water source? [1]
   (a) Pond
   (b) Lake
   (c) Spring
   (d) River

[2023]

2. Which of the following may be used for the recharging of underground water? [1]
   (a) Planting of shelter belt
   (b) Gullies and ravines
   (c) Percolation pit
   (d) Commercial farming

[2024S]

3. Which means of irrigation can be developed with minimum expenditure? [1]
   (a) Tube well
   (b) Canal
   (c) Well
   (d) Drip irrigation

[2024]

4. Which of the following may be used for the recharging of underground water? [1]
   (a) Planting of shelter belt
   (b) Plugging of gullies and ravines
   (c) Percolation pit
   (d) Tube-well irrigation

[2025S] [2026S] [2027S]

5. Which of the following prevents wastage of water? [1]
   (a) Canal
   (b) Well
   (c) Sprinkler
   (d) Tube well

[2025]

6. Assertion (A): Irrigation is practised in large parts of India. [1]
   Reason (R): India has a variety of soil types.
   (a) (A) is true and (R) is false.
   (b) (A) is false and (R) is true.
   (c) Both (A) and (R) are true and (R) is the correct explanation of (A).
   (d) Both (A) and (R) are true but (R) is not the correct explanation of (A).

[2026]

B. Short Questions (1 or 2 marks)

1. Give a reason for each of the following: [2]
   (a) Agriculture sector in India needs the support of irrigation.
   (b) Well irrigation is a popular means of irrigation in Northern India.
   [2023]

2. Distinguish between Inundation canal and Perennial canal. [2]
   [2023]

3. Why is there a need for irrigation in India? (Two reasons) [2]
   [2024S]

4. Distinguish between Inundation Canals and Perennial Canals. [2]
   [2024S] [2025S]

5. Mention one advantage and one disadvantage of using tank irrigation. [2]
   [2024]

6. [2]
   (a) What is the advantage of using Drip irrigation?
   (b) Why is Drip irrigation not practiced on a large scale in India?
   [2024]

7. State two reasons why there is a need for irrigation in India. [2]
   [2025S]

8. Mention any one advantage and any one disadvantage of well irrigation. [2]
   [2025]

9. Suggest any two measures to overcome scarcity of water in the metropolitan cities of India. [2]
   [2025]

10. The need for irrigation in India is to a large extent, influenced by the rainfall pattern of the country. Explain. [2]
    [2026S]

11. Why is canal irrigation a more suitable method of irrigation in the northern plains of India? [2]
    [2026S]

12. Raghu wants to irrigate his large field in a manner that will ensure uniform water distribution across the field along with water conservation. [2]
    (a) Name the irrigation method that will be suitable as per his need.
    (b) How will the method of irrigation mentioned by you in (a) above help to conserve water?
    [2026]

13. What is the difference between Inundation canals and Perennial canals? [2]
    [2026]

14. Drip irrigation is a powerful solution to prevent crop failure, especially during critical dry periods. Give two suitable reasons in support of this statement. [2]
    [2027S]

15. Why is canal irrigation a more suitable method of irrigation in the northern plains of India? Mention any two reasons. [2]
    [2027S]

C. Long Questions (3 marks)

1. [3]

(a) Where in India is Tank irrigation most widely used?

(b) Give one factor that has led to its popularity in the region mentioned by you.

(c) Mention one advantage of using tank as a means of irrigation.

[2023]

2. [3]

(a) What is Rainwater Harvesting?

(b) Give two ways in which Rainwater Harvesting is important for India.

[2023]

3. Name a state in India where tube wells are commonly used. Give two reasons to support your answer. [3]

[2024S]

4. [3]

(a) What is meant by Rainwater Harvesting?

(b) Mention any two water harvesting practices followed in India.

[2024S] [2025S]

5. Give a reason to explain each of the following: [3]

(a) Sprinkler irrigation is gaining popularity in recent times.

(b) Tube well irrigation is used in Punjab.

(c) North India has more area under canal irrigation.

[2024]

6. Study the picture given below and answer the questions that follow: [3]

(a) Name the water conservation practice shown in the above picture.

(b) How does this system help to reduce floods?

(c) Why is water conservation necessary? (Any two reasons)

[2024]

7. [3]

(a) Name a state in India where tube wells are commonly used.

(b) Give two geographical conditions that favour tube well irrigation in this state.

[2025S] [2026S]

8. Give one reason to explain each of the following: [3]

(a) Tank irrigation is NOT common in Northern India.

(b) Canal irrigation is important in Punjab.

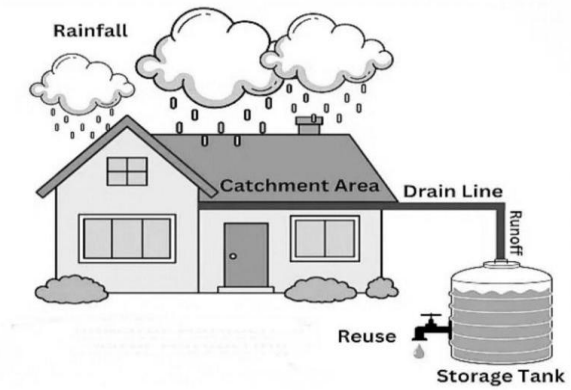

(c) All farmers do not use tube well irrigation even if the geographical condition is favourable.

[2025]

9. State any three objectives of rainwater harvesting. [3]

[2025]

10. Study the picture given below and answer the questions that follow: [3]

(a) Name the water conservation method shown in the picture.

(b) Mention any two similar water harvesting practices followed in India.

[2026S]

11. Considering the rapid depletion of groundwater and its implications for food and water security in India, sustainable management of groundwater resources is needed. [3]

Source: [Journal of Hydrology, Volume 596, May 2021]

(a) How is 'groundwater' different from 'surface water'?

(b) Why is the groundwater level rapidly declining in India?

(c) Name one conservation measure that will help in recharging of the groundwater.

[2026]

12. Give a reason for each of the following: [3]

(a) Wells are a common means of irrigation in Northern India.

(b) Many state governments have restricted the use of tubewells.

(c) Tank irrigation is a popular method of irrigation used in Karnataka.

[2026]

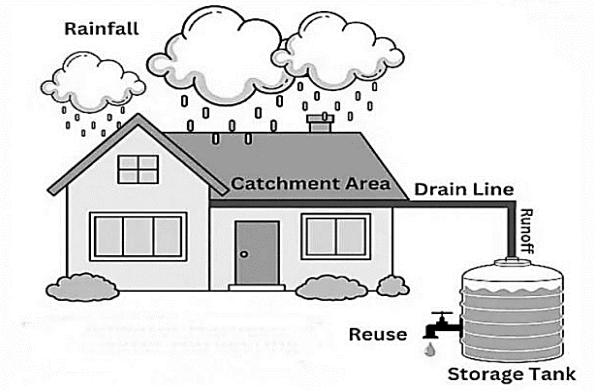

13. [3]

(a) Name one state in India where tube wells are commonly used.

(b) Mention two geographical conditions that favour tube well irrigation in this state.

[2027S]

14. Study the picture given below and answer the questions that follow: [3]

(a) Name the water conservation method shown in the picture.

(b) State two ways in which this method helps to reduce water scarcity in India.

[2027S]

Chapter 3: Mineral and Energy Resources

A. Multiple Choice Questions (1 mark each)

1. Copper is alloyed with Zinc to form: [1]
   (a) Stainless steel
   (b) Brass
   (c) Bronze
   (d) Aluminium

[2023]

2. Hirakud dam is based on which of the following rivers? [1]
   (a) River Godavari
   (b) River Mahanadi
   (c) River Krishna
   (d) River Narmada

[2023]

3. Which type of coal is called an industrial coal? [1]
   (a) Peat
   (b) Lignite
   (c) Bituminous
   (d) Anthracite

[2024S]

4. Bauxite is the ore of: [1]
   (a) Aluminium
   (b) Copper
   (c) Manganese
   (d) Iron

[2024]

5. Identify the source of energy that leads to pollution: [1]
   (a) Tidal energy
   (b) Wind energy
   (c) Natural gas
   (d) Geo-thermal energy

[2024]

6. Which type of coal is referred to as industrial coal? [1]
   (a) Peat
   (b) Lignite
   (c) Bituminous
   (d) Anthracite

[2025S]

7. Balaghat : Manganese : : Mumbai High : _____ [1]

(a) Copper

(b) Coal

(c) Iron Ore

(d) Petroleum

[2025]

8. Arrange the following in descending order according to their carbon content: [1]

(a) Anthracite, Bituminous, Peat, Lignite

(b) Bituminous, Lignite, Anthracite, Peat

(c) Anthracite, Bituminous, Lignite, Peat

(d) Anthracite, Lignite, Peat, Bituminous

[2026S]

9. Identify the type of coal that has the highest calorific value. [1]

(a) Peat

(b) Lignite

(c) Bituminous

(d) Anthracite

[2026]

10. Identify the pair which is INCORRECTLY matched: [1]

	Feature	**Type**
P	Brown coal	Lignite
Q	Coking coal	Bituminous
R	Highest calorific value	Magnetite
S	Reddish brown in colour	Haematite

(a) P

(b) Q

(c) R

(d) S

[2027S]

B. Short Questions (1 or 2 marks)

1. [2]

(a) Name the state of India that leads in the production of Manganese.

(b) What is the importance of Manganese for the Iron and Steel industry?

[2023]

2. Why is conventional source of energy not considered an ecofriendly source of energy? [2]

[2023]

3. [2]

(a) Give any one use of Iron ore.

(b) Name two Indian states where copper is found.

[2024S]

4. With reference to Hirakud project answer the following: [2]

(a) On which river is it based?

(b) Name an Indian state benefitted by the project.

[2024S] [2025S]

5. [2]

(a) Name any three varieties of coal produced in India.

(b) Name the variety of coal widely used in Iron and Steel Industries of India.

[2024]

6. [2]

(a) Name the state that is the largest producer of iron ore in India.

(b) Name any one mining area of Iron ore from the state mentioned by you.

[2024]

7. There is ample potential of setting up biogas plants in India. The National Bioenergy Programme has been recommended by the concerned Ministry, for implementation in two phases. The spread of biogas technology is a boon for Indian farmers with its direct and guaranteed benefits. (https://biogas.mnre.gov.in) [2]

(a) Why do you think generation of biogas can be achieved in every household of rural India?

(b) Mention two ways in which generation of this form of energy proves to be a boon for Indian farmers.

[2025S] [2026S] [2027S]

8. With the rising price of fossil fuel every passing day, it is very important to develop non-conventional energy resource. [2]

— Bulletin – Department of non-conventional sources of energy

(a) Name a non-conventional energy source that can be harnessed by taking advantage of India's vast coastline.

(b) State one advantage of using geothermal energy.

[2025]

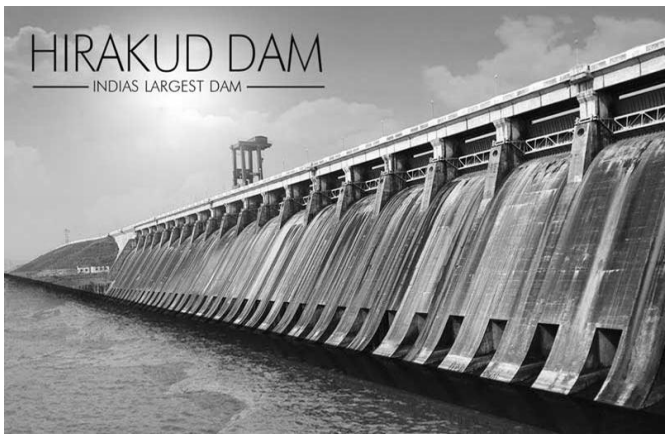

9. [2]

(a) How is Biogas formed?

(b) Mention any one advantage of Biogas over other non-conventional energy resources.

[2025]

10. With reference to the picture given below, answer the following: [2]

(a) On which river is it based?

(b) Name an Indian state benefitted by the project.

[2026S] [2027S]

11. State two advantages that Natural gas has over Coal. [2]

[2026]

12. [2]

(a) Umesh and Sagar are employed in iron ore mines in two different districts of Odisha. What are their possible places of work?

(b) State any two uses of copper.

[2026]

C. Long Questions (3 marks)

1. [3]

(a) How is Bhakra Nangal dam beneficial for Punjab?

(b) Name two states where coal is mined in abundance.

(c) Mention one advantage of using wind energy.

[2023]

2. Name the following: [3]

(a) A mineral used to generate nuclear energy.

(b) The non-conventional energy source that has the most widespread potential usage in India.

(c) An offshore oil field of India.

[2023]

3. [3]

(a) Give two disadvantages of using Petroleum as a source of power.

(b) Name an offshore oil field of India.

[2024S]

4. [3]

(a) Mention two advantages of wind energy.

(b) What is the advantage of using nuclear power in place of conventional sources of energy?

[2024S]

5. [3]

(a) Mention two ways in which Hirakud dam has helped the people of Odisha?

(b) Across which river is the Hirakud dam built?

[2024]

6. Give reasons for each of the following: [3]

(a) Geothermal energy is not popular in India.

(b) Solar energy is gaining popularity.

(c) Petroleum is considered a harmful source of energy.

[2024]

7. [3]

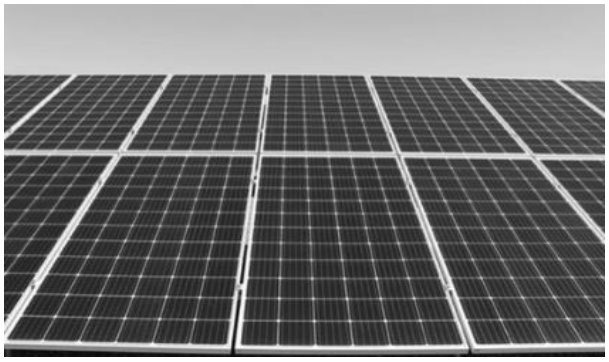

(a) Give any one use of iron ore.

(b) Name the mineral used to strengthen steel.

(c) Name two Indian states where copper is found.

[2025S]

8. [3]

(a) Identify the type of energy being harnessed in the above picture.

(b) Mention why this form of energy is preferred over fossil fuels.

(c) Why does India stand at an advantage in the production of this type of energy.

[2025S] [2026S] [2027S]

9. Give a reason for each of the following. [3]

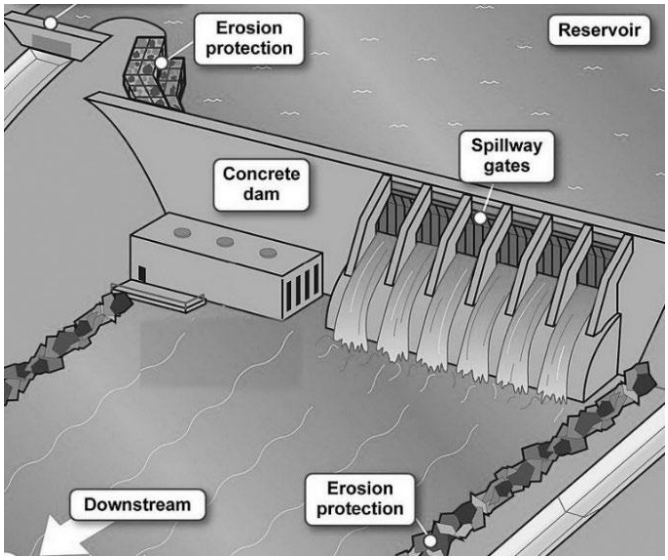

(a) Iron ore is called a versatile mineral.

(b) Windmills set up on agricultural lands are beneficial to farmers.

(c) Coal is the most preferred source of energy in Indian industries.

[2025]

10. [3]

(a) Identify the type of energy being generated in the picture given above.

(b) State why this type of energy is cheaper in the long run.

(c) Name a power project associated with the generation of this energy in the northern part of India.

[2025]

11. [3]

(a) Why is copper an important household mineral?

(b) Name two Indian states where copper is found.

(c) How is distribution of mineral deposits responsible for the concentration of industries in the Chhota Nagpur Plateau?

[2026S]

12. [3]

(a) The Bhakra Nangal project is a joint venture of which state governments?

(b) Name the river on which this project is based.

(c) Mention two benefits of the Bhakra Nangal project.

[2026]

13. Give one word for each of the following: [3]

(a) The renewable energy produced by the natural rise and fall of ocean waters.

(b) An ore of aluminium.

(c) A mineral that is used to make steel strong and resistant to rusting.

[2026]

14. Give a reason to explain each of the following: [3]

(a) Though a fossil fuel, the popularity of natural gas is very high in both domestic and industrial sectors.

(b) Use of Copper as a vital base for major alloys is undeniable.

(c) Bituminous coal is mostly widely used in generation of thermal power.

[2027S]

Chapter 4: Agriculture

A. Multiple Choice Questions (1 mark each)

1. Which of the following is NOT a problem of Indian agriculture? [1]
   (a) Dependence on monsoon
   (b) Small land holdings
   (c) Two main cropping seasons
   (d) Use of traditional methods of farming

   [2023]

2. Which of the following is a staple food grain of Indians? [1]
   (a) Wheat
   (b) Rice
   (c) Gram
   (d) Arhar

   [2023]

3. Maharashtra is the leading producer of which of the following cash crop? [1]
   (a) Jute
   (b) Cotton
   (c) Coffee
   (d) Tea

   [2024S]

4. Which crop is associated with Ratooning? [1]
   (a) Sugarcane
   (b) Jute
   (c) Rice
   (d) Cotton

   [2024S] [2025S]

5. Which of the following farming method is used to grow tea on a large scale? [1]
   (a) Subsistence farming
   (b) Plantation farming
   (c) Mixed farming
   (d) Shifting agriculture

   [2024]

6. Assertion (A): During the late 1960s, there was a many-fold increase in the production of wheat in Punjab.
   Reason (R): The Green revolution brought about increased use of inputs like HYV seeds, fertilizers and pesticides. [1]
   (a) Both A and R are true and R is the correct explanation of A.
   (b) Both A and R are true but R does not explain A
   (c) A is true but R is false
   (d) A is false but R is true

   [2025S]

7. A microbiological process that loosens the bark of a crop and facilitates removal of fibre from the stalk: [1]

(a) Rolling

(b) Ratooning

(c) Retting

(d) Fermentation

[2025]

8. Assertion (A): Agriculture in India is heavily dependent on monsoon rains.

Reason (R): Most Indian farmers practice rainfed agriculture and lack access to irrigation facilities.

(a) (A) is true but (R) is false.

(b) (A) is false but (R) is true.

(c) Both (A) and (R) are true and (R) is the correct explanation of (A).

(d) Both (A) and (R) are true but (R) is not the correct explanation of (A).

[2026S]

9. Which crop is associated with Retting? [1]

(a) Sugarcane

(b) Jute

(c) Rice

(d) Cotton

[2026S]

10. The residue of _____ forms an important part of the cattle feed and manure. [1]

(a) groundnut

(b) coffee

(c) jute

(d) pulses

[2026]

11. Identify the crop that is grown in the Rabi cropping season. [1]

(a) Sugarcane

(b) Rice

(c) Mustard

(d) Cotton

[2026]

12. Assertion (A): In intensive farming, most of the work is done by manual labour. [1]

Reason (R): The landholdings are small in size.

(a) (A) is true but (R) is false.

(b) (A) is false but (R) is true.

(c) Both (A) and (R) are true, and (R) is the correct explanation of (A).

(d) Both (A) and (R) are true, but (R) is not the correct explanation of (A).

[2027S]

13. Bhanu cultivates jute in the state that leads in the production of this crop. Which state does he work in? [1]

(a) Karnataka

(b) West Bengal

(c) Andhra Pradesh

(d) Gujarat

[2027S]

B. Short Questions (1 or 2 marks)

1. Differentiate between Intensive farming and Extensive farming. [2]

[2023]

2. Mention two problems faced by the Indian farmers. [2]

[2023]

3. Mention two agricultural reforms done by the government for the betterment of the agricultural sector. [2]

[2024S] [2025S]

4. [2]

(a) Mention the climatic conditions found suitable for growing groundnut.

(b) Name the state that is the leading producer of groundnut in India.

[2024S]

5. Why is agriculture considered an important sector of Indian economy? (Any two points) [2]

[2024]

6. [2]

(a) What is mixed farming?

(b) Mention any one advantage of mixed farming.

[2024]

7. [2]

(a) State one point of difference between Rabi and Kharif cropping seasons.

(b) Name the state that is the leading producer of groundnut in India.

[2025S] [2026S]

8. Mention two climatic conditions that favour the cultivation of groundnut. [2]

[2025]

9. Give any two reasons why Maharashtra has emerged as an important sugarcane producing state. [2]

[2025]

10. Mention any two agricultural reforms done by the government for the betterment of the agricultural sector. [2]

[2026S]

11. Differentiate between subsistence farming and commercial farming. [2]

[2026]

12. [2]

(a) Name a state that leads in the production of jute.

(b) Mention a geographical factor that is responsible for the state mentioned in (a) above being the leading producer of jute.

[2026]

13. Despite being the backbone of the Indian economy, our agricultural sector faces several problems. Mention any two such problems. [2]

[2027S]

14. The Green Revolution marked a transformation in Indian agriculture. [2]

(a) In the light of the above statement, explain how Green Revolution has been particularly significant for the Indian economy.

(b) State two key inputs whose widespread use helped usher in the Green Revolution.

[2027S]

C. Long Questions (3 marks)

1. [3]

(a) Give one advantage of transplantation method of sowing rice.

(b) What is 'Ginning'?

(c) Name any two pulses grown in India.

[2023]

2. [3]

(a) What is meant by 'Retting'?

(b) What kind of soil is required for the cultivation of tea?

(c) Why is pruning necessary for tea plant?

[2023]

3. With reference to cultivation of pulses answer the following: [3]

(a) Name a soil found suitable for the growth of pulses.

(b) Name any two pulses grown in India.

(c) Why is it a popular food crop of India?

[2024S]

4. Rohan is a farmer. He asked his friend to help him get some labourers for 'GINNING'. [3]

(a) Which crop do you think is grown by Rohan?

(b) Mention any two climatic conditions suitable for this crop.

[2024S]

5. Give one reason to explain each of the following: [3]

(a) West Bengal is a leading producer of jute.

(b) Millets are fast becoming the popular food crops.

(c) More than two ratoon crops are not advisable for sugarcane farmers.

[2024]

6. [3]

(a) With reference to tea cultivation, explain the term 'fine pluck'.

(b) Name the Indian state that leads in coffee production.

(c) Why is cotton grown as a Kharif crop in India?

[2024]

7. With reference to cultivation of pulses answer the following: [3]

(a) Name a soil found suitable for the growth of pulses.

(b) Name any two varieties of pulses grown in India.

(c) Give a reason why is it a popular food crop of India.

[2025S]

8. Rohan, a farmer, hired some labourers to help him with 'GINNING'. [3]
   (a) Name the crop grown by Rohan.
   (b) Mention any two climatic conditions suitable for this crop.

[2025S] [2026S]

9. Give one reason to explain each of the following: [3]
   (a) Trees are planted in between the rows of coffee plants.
   (b) Cotton cultivation requires plenty of cheap labour.
   (c) Hill slopes are best suited for tea cultivation.

[2025]

10. Explain the following: [3]
   (a) Mixed farming
   (b) Zayad
   (c) Transplantation

[2025]

11. With reference to cultivation of coffee, answer the following: [3]
   (a) Name a state that leads in the production of coffee in India.
   (b) Give two geographical conditions present in this state that make it the leading producer.
   (c) Other than coffee, name a crop that can also be raised in plantations.

[2026S]

12. [3]
   (a) Why are Silver Oak trees and Cardamom trees planted in coffee plantations along with the coffee plants?
   (b) State two climatic conditions that favour the cultivation of coffee.

[2026]

13. [3]
   (a) Name the cropping season in which Bajra is grown.
   (b) Why is wheat not cultivated extensively in West Bengal and the extreme southern states of India?
   (c) Why is the cultivation of soyabean gaining popularity in recent times?

[2026]

14. With reference to the cultivation of cash crops, answer the following questions: [3]
   (a) Name the crop that predominantly grows in the hilly regions of West Bengal.
   (b) Give two climatic conditions present in this state that favours the cultivation of the crop mentioned in (a).
   (c) Which other state of India is noted as the leading producer of the crop mentioned in (a)?

[2027S]

15. Study the picture and answer the questions that follow: [3]

(a) Identify the type of farming depicted here.

(b) State one way in which it provides economic benefit to the farmer.

(c) Give a reason why some crops are considered as cash crops.

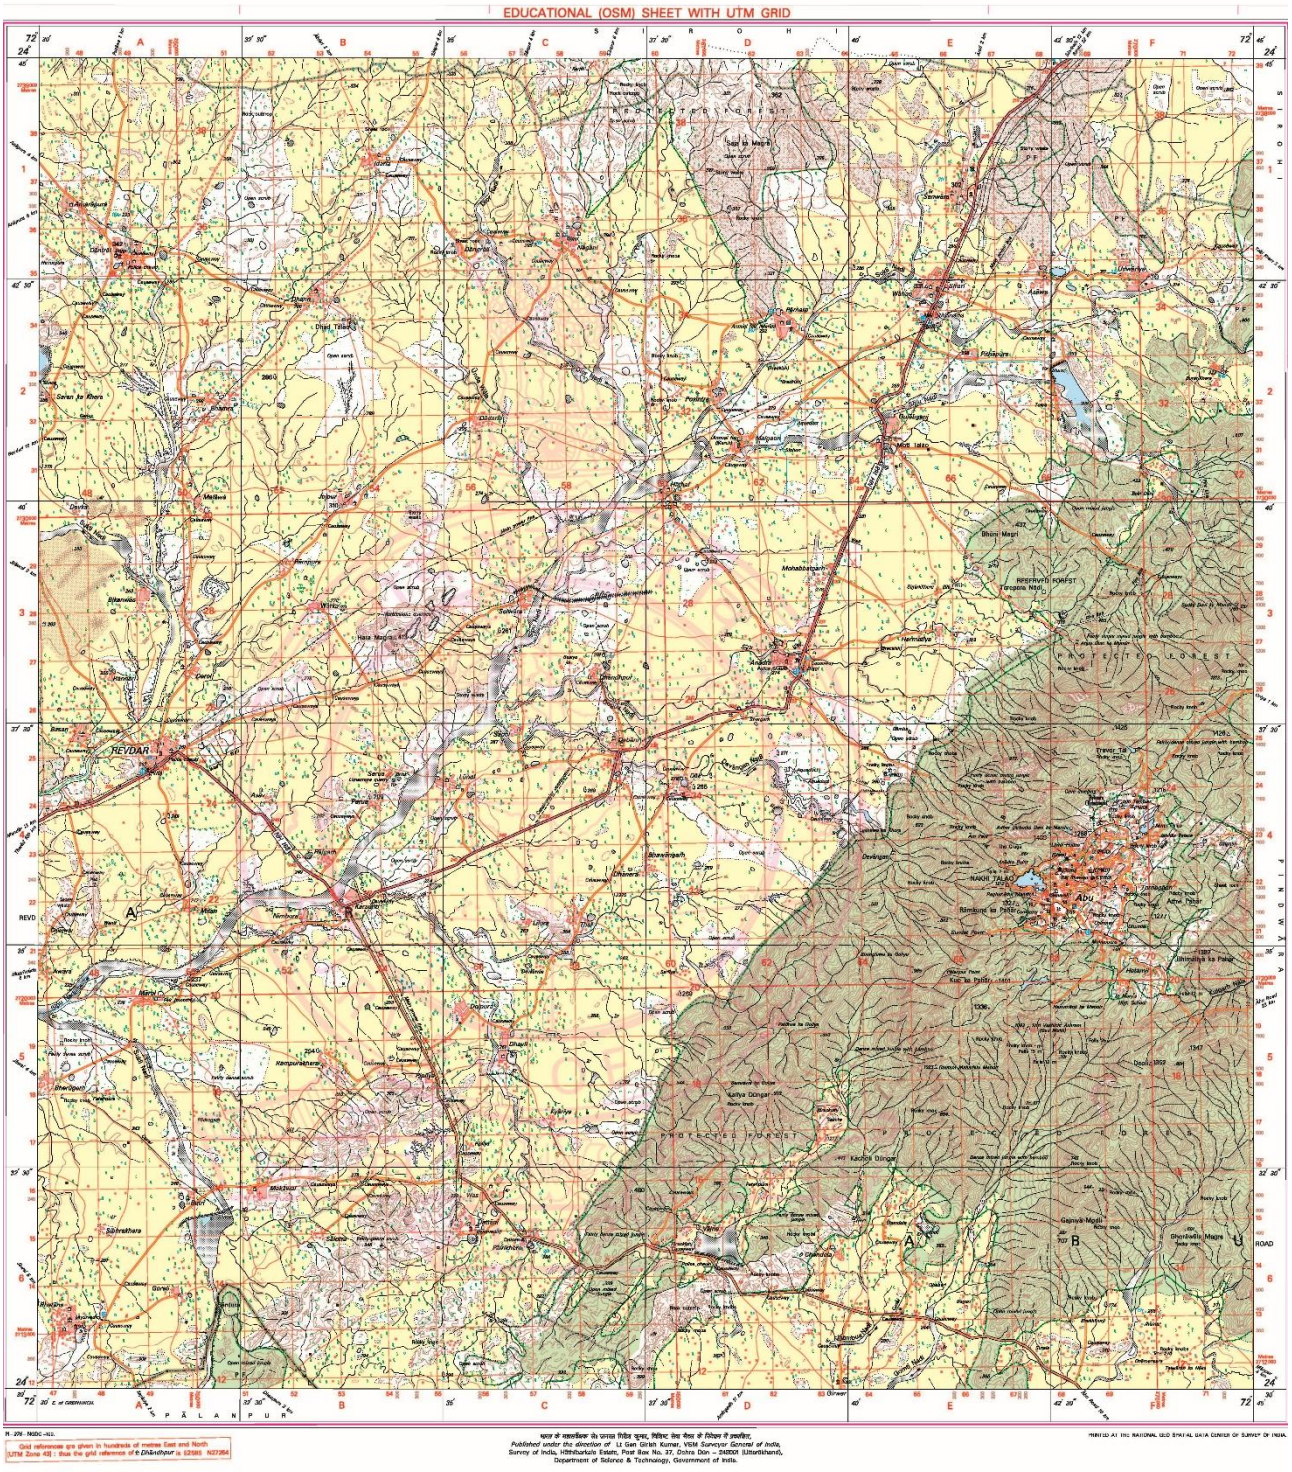

[2027S]

Chapter 5: Topo Sheet (Question 1)

Question 1 is answered from the Survey of India map extract supplied with the paper. Two extracts were available in the uploaded papers and are reproduced below: G43S7 (used by the questions marked [2023], [2024S] and [2025S], which refer to Mahudi Moti, Kotda, Rampura, etc.) and G43S10 (used by [2025], [2026S] and [2027S], which refer to Pamera, Malgaon, Gulabganj, etc.). The [2024] and [2026] Board papers use other portions of sheet G43S7 whose extract was not part of the uploaded files.

Survey of India Map Sheet No. G43S7 (extract, scale 1:50,000)

Survey of India Map Sheet No. G43S10 (extract, scale 1:50,000)

1. [2]

(a) Give the four-figure grid reference for Δ224.

(b) What is the contour interval used in the given map extract?

[2023]

2. [2]

(a) Mention two manmade features seen in grid square 2706.

(b) Mention two natural features seen in grid square 2905.

[2023]

3. [2]

(a) What do you understand by 1:50,000 printed below the map extract?

(b) What is the pattern of drainage seen in the grid square 2505?

[2023]

4. [2]

(a) What do you understand by .10r in 2709?

(b) What is the compass direction of Mahudi Nani (2604) from Panswala (2909)?

[2023]

5. Calculate the area in kilometre square of the region enclosed between Easting 26 to 29 and Northing 05 to 11. [2]

[2023]

6. [2]

(a) Give the six-figure grid reference for .201 in the eastern part of the map extract.

(b) What are the brown patches in the north east quarter of the map extract?

[2024S] [2025S]

7. Mohan goes on a bicycle from 02 northing to 12 northing in a straight line. If he moves at a speed of 10 kilometers per hour, how much time will he take to reach his destination? [2]

[2024S] [2025S]

8. [2]

(a) What is the compass direction of Rampura (2709) to Kotda (3005)?

(b) What is the nature of streams seen in the map extract?

[2024S]

9. [2]

(a) Ramesh returned to his native place Mahudi Moti (2404) after a gap of ten years and was happy to see the development around his village. What according to you show that the area around his village has developed?

(b) What is the black vertical line made between the easting 25 and 26?

[2024S] [2025S]

10. Mention two manmade and two natural features in the grid square 2508. [2]

[2024S] [2025S]

11. [2]

(a) Give the six-figure grid reference for spot height .522.

(b) What is the pattern of settlement in the grid square 3591?

[2024]

12. [2]

(a) Mention two man-made features seen in the grid square 3794.

(b) Mention two means of transport used by the people of Nani Bhatamal in the grid square 3691.

[2024]

13. [2]

(a) Identify the landform marked by the contours in the grid square 3896.

(b) What is the pattern of drainage seen in the grid square 3697?

[2024]

14. [2]

(a) What is the reason for the presence of causeway in the grid square 3695?

(b) What is the compass direction of Khara (4097) from Karja (3994)?

[2024]

15. Calculate the area in kilometre square of the region to the south of 94 Northing. [2]

[2024]

16. [2]

(a) What is the compass direction of Rampura (2709) from Kotda (3005)?

(b) If you are moving along the left bank of Sipu river, which settlement will you come across?

[2025S]

17. [2]

(a) Give the six-figure grid reference for spot height .437 in the southeastern part of the map extract.

(b) Aman, a local craftsman, wants to sell his product to a large gathering to earn money instantly.

1. Which settlement should he go to?
2. Name the month in which he should visit the settlement named by you above.

[2025]

18. [2]

(a) On which bank of the Sukli nadi is the settlement of Pamera situated?

(b) Identify the settlement pattern seen in the grid square 6732.

[2025]

19. Roshan, while travelling from Sirori to Tokra, observed that the surface water sources are dry except for the reservoir near Tokra. [2]

(a) What according to you may be the reason for the presence of water in the reservoir in 6832 near Tokra settlement?

(b) State whether this reservoir is artificial or natural source of water.

[2025]

20. [2]

(a) What is the direct distance between Gulabganj to Pithapura? Give your answer in kilometre.

(b) Mention the compass direction of Pithapura from Gulabganj.

[2025]

21. [2]

(a) Name two man-made features seen in the grid square 6534.

(b) Define contour interval.

[2025]

22. [2]

(a) Identify the conventional symbol found at the six-figure reference of 666364.

(b) Identify the drainage pattern in the Grid Square 6334.

[2026S]

23. [2]

(a) Calculate the shortest distance in km. from Malgaon to Mohabbatgarh.

(b) In which direction will Sneha be driving if she is going from Mohabbatgarh to Sanwara along the metalled road?

[2026S]

24. [2]

(a) Write whether the conventional symbol marked as a blue dot in the Pamera settlement is man-made or natural.

(b) A resident of Malgaon settlement (Grid Square 6131) has to report a crime at the nearest police station. Which settlement will he be visiting?

[2026S]

25. [2]

(a) How do the local people benefit from the causeways seen in this region?

(b) Explain why Fire Lines are significant from the point of view of the environment.

[2026S] [2027S]

26. [2]

(a) Rajiv is travelling from Gulabganj for a visit to the Reserved Forest near Tarepara Nadi (Grid square 6728). Which two means of transport he would come across during his journey?

(b) Differentiate between the types of huts in Grid Square 6935 and the ones found in Grid Square 7033.

[2026S]

27. [2]

(a) What is the social significance of the temple that is found at the six-figure grid reference 362001?

(b) What is the reason for very few settlements in the southeastern quarter of the map extract?

[2026]

28. [2]

(a) What is .3r in grid square 3501?

(b) Identify one relief feature found in the grid square 3796.

[2026]

29. [2]

(a) The area shown on the map extract has seasonal streams, but in 3903 a large perennial water source can be seen. What may be the reason for the presence of this large perennial source of water?

(b) Which other source of water seen on the map extract is perennial?

[2026]

30. [2]

(a) While travelling for work from Dhaneri (3100) to Marwada (3197) along the metalled road, Sahil crossed over a number of ‘causeways. Why are causeways present in the area shown on the map extract?

(b) Identify the drainage pattern seen in the grid square 3697.

[2026]

31. [2]

(a) What is the difference in altitude between the highest point on the map extract and the contour height in grid square 3203?

(b) What is the black horizontal line made between 98 and 99 northings called?

[2026]

32. [2]

(a) What does the figure 300 indicate in grid square 6730?

(b) What does RF in 'RF 1:50,000' denote?

[2027S]

33. [2]

(a) A farmer from the small village of Sigarli Khera (Grid Square 6528) travels northwards to reach Moti Talao. Which means of transport will he be using?

(b) What would be the actual length of the National Highway between Distance Stones 222 and 226?

[2027S]

34. [2]

(a) Give two evidence to suggest that Pamera is a more important settlement than Malgaon.

(b) Calculate the area of the map extract enclosed by Eastings 63 and 67 and Northings 29 and 32. Give your answer in km square.

[2027S]

35. [2]

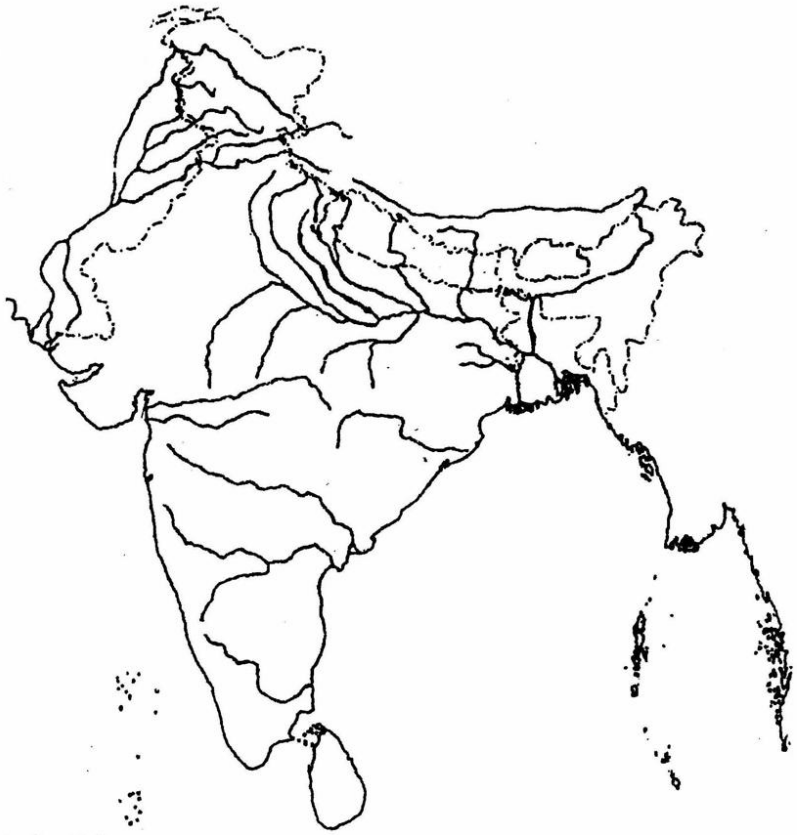

(a) Identify the conventional symbol at the six-figure reference of 666364.

(b) Identify the drainage pattern in Grid Square 6334.

[2027S]

Chapter 6: India Map (Question 2)

On the outline map of India provided (use arrows to avoid overcrowding the map). Each item carries 1 mark.

Outline Map of India for Question 2

1. Mark and label the Satpura. [1]
[2023]

2. Shade and label the Gulf of Kutch. [1]
[2023] [2024S] [2025S] [2026] [2027S]

3. Mark and label the River Chambal. [1]
[2023]

4. Mark and label Delhi. [1]
[2023]

5. Mark and label 80o30’ E longitude. [1]
[2023]

6. Mark and label Jharia coalfield. [1]
[2023]

7. Mark with arrows and name the Southwest Monsoon winds. [1]
[2023]

8. Mark and label the Karakoram Pass. [1]
[2023] [2026]

9. Shade and label a sparsely populated region in Western India. [1]
[2023]

10. Shade an area having Alluvial soil. [1]
[2023]

11. Shade and label an alluvial soil area of India. [1]

[2024S]

12. Mark with a dot and name the city which lies on the banks of river Jhelum. [1]
[2024S]

13. Mark and name the highest peak of India. [1]
[2024S]

14. Mark with arrow and label N E Monsoon wind. [1]
[2024S]

15. Shade and label a densely populated area in South India. [1]
[2024S]

16. Mark and label Himalayas. [1]
[2024S]

17. Mark and label Brahmaputra. [1]
[2024S]

18. Mark and label Tropic of Cancer. [1]
[2024S]

19. Mark and label Malabar coast. [1]
[2024S]

20. Mark and label the river Krishna. [1]
[2024]

21. Mark and label Eastern Ghats. [1]
[2024] [2025S]

22. Shade and label a densely populated area in the southern part of India. [1]
[2024]

23. Shade and label the Konkan coastal plain. [1]
[2024]

24. Mark with an arrow and label the direction of western disturbance. [1]
[2024]

25. Shade and label the Thar Desert. [1]
[2024]

26. Shade and label the Andaman Sea. [1]
[2024]

27. Mark and label the city Chennai. [1]
[2024]

28. Mark and name the highest peak of Himalayas in India. [1]
[2024] [2025S]

29. Mark and label Mumbai High. [1]
[2024]

30. Shade and label an area of alluvial soil in the north-east. [1]
[2025S]

31. Mark using a dot and name the commercial capital of India. [1]
[2025S]

32. Mark with arrows and name the wind bringing rainfall to Punjab in winter. [1]
[2025S]

33. Shade and label a sparsely populated area. [1]
[2025S]

34. Mark and name a tributary of an important peninsular river. [1]
[2025S]

35. Mark and label the most important latitude passing through the country. [1]
[2025S]

36. Mark and label the Coromandel coast. [1]
[2025S] [2026S]

37. Mark and label the Nathu-La pass. [1]
[2025]

38. Shade and name the coastal plain that occupies a large part of Kerala. [1]
[2025]

39. Mark and label Digboi. [1]
[2025]

40. Mark and label Chilka lake. [1]
[2025]

41. Mark with arrows and name the wind that brings rainfall to Tamil Nadu coast during winter. [1]
[2025]

42. Mark and label the river Sutlej. [1]
[2025]

43. Mark and label the Standard Meridian of India. [1]
[2025]

44. Mark and label Satpura range. [1]
[2025]

45. Shade and label the Chota Nagpur plateau. [1]
[2025]

46. Mark and label Visakhapatnam. [1]
[2025]

47. Shade and label an area of black soil in Gujarat. [1]
[2026S]

48. Mark using a dot and name a major river port of India. [1]
[2026S]

49. Shade and label the Deccan plateau of India. [1]
[2026S]

50. Mark and label the Palk Strait. [1]
[2026S]

51. Mark with arrows and name the wind which brings rainfall to the Konkan coast. [1]
[2026S]

52. Shade and label a sparsely populated area in western India. [1]
[2026S]

53. Mark and label the hills that are popularly called Blue Mountain. [1]
[2026S]

54. Mark and name the river known as the ‘Sorrow of Bengal’. [1]
[2026S]

55. Mark and label the Indian Standard Meridian. [1]
[2026S]

56. Mark and name an old fold mountain range of India. [1]
[2026]

57. Mark with an arrow and name the river also known as the ‘Sorrow of Bihar’. [1]
[2026]

58. Mark and label an offshore oil field of India. [1]
[2026]

59. Shade and label the Laterite soil area in the northeastern part of India. [1]
[2026]

60. Mark and name the shared capital city of Punjab and Haryana. [1]
[2026]

61. Mark and label the Western Ghats. [1]
[2026]

62. Shade and label the river Krishna. [1]
[2026]

63. Shade and label an area of dense population. [1]
[2026]

64. Mark and name the hill range where the Eastern Ghats and the Western Ghats meet. [1]
[2027S]

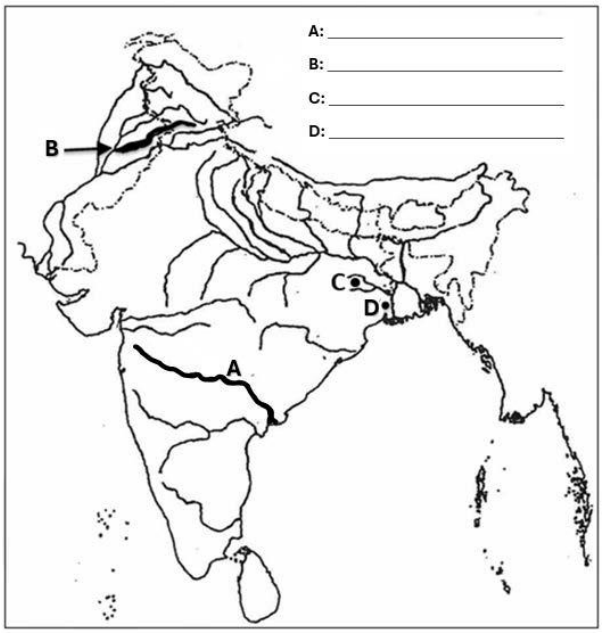

65. Mark and label the Wular Lake. [1]
[2027S]

66. Write SP over a sparsely populated area north of Tropic of Cancer. [1]
[2027S]

67. Shade and label an area of black soil. [1]
[2027S]

68. Mark and label the wind that brings rain to Mumbai in July. [1]
[2027S]

69. Identify the following on the outline map of India provided: [4]

(a) The river marked A which is known as the Ganga of the south.
(b) The river marked B.
(c) The coalfield marked C.
(d) The riverine port city marked D.

[2027S]
